Beginner's Olive Oil & Lavender Soap Kit

INSIDE YOUR KIT

Our Beginner's Olive Oil & Lavender Soap Kit includes the key ingredients you need to make a simple cold process soap at home. Perfect for first-time soap makers, this bundle takes the guesswork out of shopping so you can focus on learning the process, understanding your ingredients, and creating a beautifully gentle handmade soap.

RECIPE

Olive Oil	500 g
Coconut Oil	100 g
Lye (Sodium Hydroxide)	80 g
Distilled Water	195 ml
Lavender Essential Oil	10 g

MAKES

Approximately 10-12 standard soap bars (depending on your mould).

YOU'LL ALSO NEED

- Silicone soap mold
- Immersion blender (stick blender)
- Digital kitchen scale
- Heat-resistant containers
- Safety glasses
- Gloves
- Spatula or spoon

BEFORE YOU BEGIN (SAFETY)

Important: Sodium hydroxide (lye) is highly caustic before the soap has fully saponified. Always wear gloves and eye protection, work in a well-ventilated area, and add the lye to the water-never the other way around. Use heat-resistant containers and dedicated utensils that will only be used for soap making. Do not use equipment that has come into contact with lye for food preparation. Keep children and pets away while making soap.

EASY DIY SOAP METHOD

1

Mix the lye into the water (never the other way around!) and leave to cool.

2

Mix together the olive oil and coconut oil (it may need to be melted first).

3

Pour the lye mixture gently into the oils, then use an immersion blender to blend until trace is achieved (pudding consistency).

4

Mix in the essential oil and pour into molds.

5

Cover and set aside for 24 to 30 hours.

6

Remove from the moulds and let the soap cure in a cool, dry place for approximately 4 weeks, turning the bars occasionally. This allows excess water to evaporate and ensures the soap has fully saponified before use.

HELPFUL TIPS

- Work in a well-ventilated area.
- Measure all ingredients carefully.
- Trace can take a few minutes-be patient.
- Lavender essential oil adds a calming scent
- and skin-loving benefits.
- Store your soap in a cool, dry place while curing.
